Things to check

Nothing on the plan needs checking.

Suggestions

S1 Rug — how far it reaches past each side of the bed: 0′-0″ (0 cm), calculated from rug depth 8′-0″ (Typical size) and bed width 4′-6″ (Photo estimate); suggested about 1′-6″ (46 cm) each side. Check the rug size before you buy — a larger rug may suit the bed better.

How to measure

Room: measure wall to wall at floor level.
Ceiling height: measure floor to ceiling.
Doors and windows: measure the opening width inside the frame.
Bed: measure the frame's outside width × length.
Furniture: measure width × depth × height at the widest points.
Rug: measure length × width.
Plants: measure the pot width and the overall height.
Enter what you measure in the app — every sheet updates.

About this set

Room size is an estimate until you measure it in the app. Sizes are marked Your size (the size you set), Measured ✓ (you measured it), From product, Photo estimate or Typical size. Doors and windows read from your photo are approximate. Check every dimension on site before you buy or build.

CHECK BEFORE YOU BUY

TYPE	WHAT TO CHECK IN THIS ROOM
Nightstand	Top within 0′-2″ of mattress height Drawers open without hitting the bed Outlet within cord reach
Armchair	Recliners need wall clearance behind Arm width adds to the footprint
Bed	Mattress: measure the frame's inside (platform) size before you buy 2′-0″ clear on the side you get in — here 3′-9″ (113 cm) on the bottom side (to the wall), enough; calculated from room width 11′-0″ (Typical size) and bed width 4′-6″ (Photo estimate)
Rug	Front legs of furniture on the rug Rug pad size

CHECK BEFORE YOU BUY

TYPE	WHAT TO CHECK IN THIS ROOM
Curtain	Rod: W1 2′-0″ (Photo estimate) + 0′-8″ each side (0′-6″ to 0′-10″) = 3′-4″ 2 panels about 4′-6″ wide each for W1 (2 × the rod width) Drop: about 7′-7½″ from a rod 0′-4″ below the ceiling to just above the floor, calculated from ceiling height 8′-0″ (Typical size); for sill-length curtains, measure from the rod to the sill

SEQUENCE & NOTES

Do the steps in this order so finished work isn't damaged by the next one.

Order of work

1. Measure & verify

Measure room length, width and ceiling height; door and window widths and positions; outlet and switch locations. Enter them in the app so every number on these sheets updates.

Check on site: Measure the room sizes marked Photo estimate or Typical size · check each product's size before you buy · check that doors open fully · check behind furniture

2. Lighting & electrical

Install fixtures before furniture goes in so the ladder has room.

Check on site: Licensed electrician for anything hard-wired · power off at the breaker · fixture box rated for the weight

3. Deliver & place furniture

Bring pieces in largest first; place them by the dimensions on the furniture plan.

Check on site: Large pieces fit through the door and turns · walkways match the furniture plan · anchor dressers, bookcases and TVs to the wall

4. Hang art, mirrors & curtains

Hang them last, once furniture is in place, so you can center them on what's below.

Check on site: Find studs or use anchors rated for the weight · art center about eye level · curtain rod wider than the window

Placement

Leave about 2′-0″ to 3′-0″ (61–91 cm) of open floor along each side of the bed you walk around.

Here: 3′-9″ (113 cm) on the bottom side (to the wall), enough; calculated from room width 11′-0″ (Typical size) and bed width 4′-6″ (Photo estimate)

Place the rug under the lower two-thirds of the bed; measure the room before choosing its size.

Keep main walkways about 3′-0″ (91 cm) clear.

Here: No alerts on the main walkways checked

Hang art so its center is about 4′-9″ to 5′-0″ (145–152 cm) from the floor.

Safety and licensed work

Electrical, gas, plumbing and structural work needs a licensed pro, and a permit where your city requires one.

Don't remove or cut into a wall until a pro confirms it isn't load-bearing.

Homes built before 1978 may have lead paint. Test before sanding or scraping, or hire an EPA RRP-certified painter.

Keep windows open and run a fan while painting, and follow the safety notes on the can.

Anchor tall dressers, bookcases and TVs to the wall to prevent tip-overs.
