How to measure

Room: measure wall to wall at floor level.
Ceiling height: measure floor to ceiling.
Doors and windows: measure the opening width inside the frame.
Furniture: measure width × depth × height at the widest points.
Rug: measure length × width.
Plants: measure the pot width and the overall height.
Lamps: measure the base or shade width and the overall height.

Enter what you measure in the app — every sheet updates.

About this set

Room size is an estimate until you measure it in the app. Sizes are marked Your size (the size you set), Measured ✓ (you measured it), From product, Photo estimate or Typical size. Doors and windows read from your photo are approximate. Check every dimension on site before you buy or build.

SEQUENCE & NOTES

Do the steps in this order so finished work isn't damaged by the next one.

Order of work

1. Measure & verify

Measure room length, width and ceiling height; door and window widths and positions; outlet and switch locations. Enter them in the app so every number on these sheets updates.

Check on site: Measure the room sizes marked Photo estimate or Typical size · check each product's size before you buy · check that doors open fully · check behind furniture

2. Deliver & place furniture

Bring pieces in largest first; place them by the dimensions on the furniture plan.

Check on site: Large pieces fit through the door and turns · walkways match the furniture plan · anchor dressers, bookcases and TVs to the wall

3. Hang art, mirrors & curtains

Hang them last, once furniture is in place, so you can center them on what's below.

Check on site: Find studs or use anchors rated for the weight · art center about eye level · curtain rod wider than the window

Placement

Leave 36–46 cm (1′-2″ to 1′-6″) between the sofa and the coffee table.

Here ✓

Choose a rug shape that suits the space; measure the room before choosing its size.

Keep main walkways about 91 cm (3′-0″) clear.

Here: 2 places are tighter than this — see C1, C2 on the cover

Hang art so its center is about 145–152 cm (4′-9″ to 5′-0″) from the floor.

Safety and licensed work

Electrical, gas, plumbing and structural work needs a licensed pro, and a permit where your city requires one.

Don't remove or cut into a wall until a pro confirms it isn't load-bearing.

Homes built before 1978 may have lead paint. Test before sanding or scraping, or hire an EPA RRP-certified painter.

Keep windows open and run a fan while painting, and follow the safety notes on the can.

Anchor tall dressers, bookcases and TVs to the wall to prevent tip-overs.
